## *The Sybaritic Education & Business Development Advantage*

At Sybaritic, the core of our mission is education. Our team of professional esthetic educators conducts weekly and monthly training seminars in our state-of-the-art, on-site Sybaritic Training Institute. Our knowledge and experience can help you to perform successful SkinBella services with impressive business results. From beginning to advanced training, we offer a hands-on learning experience utilizing the new SkinBella™ Particle-Free Dermabrasion System paired with Oxygen Botanicals™ Skincare Products. Our educators will provide you with a comprehensive presentation of SkinBella, the science behind the system, its applications - and help you to successfully use and market your new system! Contact us today for more information!

## reclaim your radiance

**SkinBella™**  
Particle-Free Dermabrasion

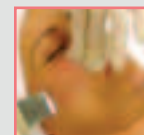

*An advanced skin rejuvenation system for glowing, radiant skin!*

Introducing SkinBella™, the latest Particle-Free Dermabrasion member of Sybaritic's renowned dermabrasion family. Sybaritic pioneered the technology of particle-free dermabrasion. The new SkinBella™ offers exciting advancements in this technology. SkinBella™ provides effective dermabrasion technology for facial rejuvenation.

With just one pass, SkinBella™ provides even, controlled exfoliation. SkinBella features a Bi-Elastic Blade™ designed to transmit high-speed elastic waves at an impressive 25,000 cycles per second to the skin. This elastic micro-vibration wave precisely exfoliates the skin to enhance exfoliation, moisturization, and clearing. SkinBella is an easy to use system, allowing estheticians to simply pass the Bi-Elastic Blade lightly across the surface of the skin. SkinBella's Bi-Elastic Blade has a blunt edge and wide surface area to efficiently exfoliate. The stainless steel Bi-Elastic Blade has been developed for ease of sterilization.

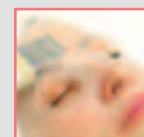

*SkinBella's superior dermabrasion services can be performed without the messy, clogging, irregular particulates used with yesterday's microdermabrasion.*

## SkinBella™ Offers Four Advanced Aesthetic Functions

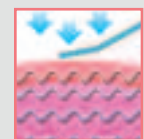

### *Uncover new skin, smooth and soft to the touch!*

SkinBella's new dermabrasion technology produces a highly effective skin exfoliation. Dead skin cells, excess oil, and cosmetic residue are removed and pores are cleared resulting in deeply cleansed, smooth skin. Specific Oxygen Botanicals products are applied for maximum effectiveness.

### *Pamper and moisturize parched skin!*

After exfoliation, skin is soothed and hydrated with SkinBella's moisturization function. The complimentary line of Oxygen Botanicals skincare products are water-based and allow for maximum penetration. Used simultaneously, SkinBella and Oxygen Botanicals boost hydration levels and deeply penetrate specific serums to help alleviate dry skin concerns.

### *Energize skin for a fresh, vibrant glow!*

Pale, waxy complexions will greatly benefit from SkinBella's ability to energize and invigorate the skin. Skin is left glowing as a result of the micro-massage action of the Bi-Elastic Blade.

### *Even and smooth skin tone!*

SkinBella offers functions that take skin balancing to the next level, resulting in brilliant skin tonality. Accumulations of pigment and minor scarring can be smoothed and evened through a series of SkinBella sessions. Using a combination of physical/mechanical processes and Oxygen Botanicals skincare products, the reduction of skin discolorations and improved tonality is achieved.

# Why Choose SkinBella™?

## SkinBella™ Replaces Microdermabrasion and Chemical Peels

SkinBella	Microdermabrasion	Chemical Peels
<ul style="list-style-type: none"> <li>• SkinBella modalities are non-invasive.</li> <li>• SkinBella will not produce bleeding.</li> <li>• The Bi-Elastic Blade provides an even exfoliation of all areas.</li> <li>• SkinBella does not use particulates or harsh chemicals.</li> <li>• There is minimal redness, no downtime or lifestyle changes required following a SkinBella session.</li> </ul>	<ul style="list-style-type: none"> <li>• Microdermabrasion can cause abrasion, trauma, infection and damage to the epidermal layer of the skin.</li> <li>• Microdermabrasion may result in prolonged redness and downtime.</li> </ul>	<ul style="list-style-type: none"> <li>• Invasive in nature.</li> <li>• Side effects range from redness and flaking to discomfort and swelling.</li> <li>• Additional care needed.</li> <li>• May cause uneven pigmentation or scarring via complex, unpredictable chemical reactions.</li> </ul>
